

Trombone Mouthpieces

Provided by **David Werden Publications and TubaEuph.com**

Any brass musical instrument will respond better and produce better tone when it is used with a mouthpiece that best fits the horn and the player. The list below consists of trombone mouthpiece specifications provided by manufacturer's literature. Different brands may measure slightly differently. The cup depth indication is subjective and is provided for convenience. The abbreviations are: S=shallow, MS=medium-shalloe, M=medium, MD=medium-deep, D=deep. One maker's M might be comparable to another maker's MD. The same subjectivity applies to the Rim Width indication. Entries in the Notes column are usually gleaned from the maker's marketing literature. (If you don't see a mouthpiece brand that should be included, or if you have corrections, please use our [contact form](#) to send a suggestion. It would help if you can provide the manufacturer's web site.)

If you wish to find moutpieces that are close to yours in size (or close to another model you know), just click on the Rim column for the one you want to compare. The page will reload with mouthpieces that are the same size, or are slightly smaller or larger.

Shank size: Large, Bass Trombone Size. (Change to: [Tenor](#))

Brand	Model	Rim (mm/inches)	Cup Depth	Rim Width	Throat	Back bore	Notes
Bach	15	24.40 / 0.961"	S	Medium-Wide	.276"	429	
	12	24.50 / 0.965"	M	Medium-Wide	.276"	429	
	12E	24.50 / 0.965"	S	Medium-Wide	.276"	429	Good choice for bass trumpet
